The Futon Essence

Space is at premium. Isn't it? – A food for thought!

A futon is popular in Japan because, even in homes, space is at a premium. This means that many rooms are used for different tasks, at different times of the day. So, in a two or three room Japanese home, the same space can be used as a sitting room in the daytime and a bedroom at night. How is this possible? Unlike the West, where beds are popular, the Japanese use a mattress and quilt, which they spread on the mats in the room. The mattress forms the bed, on which the sleeper lies, and the quilt is thrown over the sleeper. In the daytime, both the mattress and the quilt are rolled away, and the room is used as a sitting room or a dining room.

In the West, futons have become popular as more and more people have moved out of houses and have started to live in two-room or single-room apartments instead. Furniture designers have created sofas, ottomans, and love seats that can be used for seating during the day and transformed into beds with a few discreet pulls and pushes at night. This is very useful for a single person or a young couple, who need to put up guests for the night, and do not have a spare bedroom.

Both in Japan and in the West, futon is a useful, space-saving item of furniture. However, there is one difference between Western and Japanese design. Instead of performing different tasks in the same space, as the Japanese do, the Western designer gets the furniture to do the multitasking.

Futon Covers USA provides wide range of covers, which you can use for sofas, chairs, ottomans, and love seats. We provide a wide range of covers in abstracts, animal prints, Asian and South West US designs, floral and retro prints, stripes and plaids, and solid colored covers. You name it and we have it. We can also provide covers with the leather or suede look, and theme prints of various kinds. Our covers can fit futons elegantly that are 6 inches to 10 inches in thickness.

Futon Covers Online

Why is online shopping so popular with consumers nowadays? Let's state the reasons. When you are shopping online, it's your fingers, not your feet, which do the walking, so you end up saving on shoe leather and energy. Online shopping is also environmentally beneficial-think of not driving your car from your house to the local mall! Another reason why online shopping is so popular is that you could be sitting in the middle of Antarctica, the Pacific Ocean, or the Sahara and purchase goods from a merchant in London, Paris, or New York. Finally, think of the wide variety of choice-if you don't like the selection on a certain Web site, you can just click on the next one available on the list. This also implies that online shopping is totally consumer-driven-if people don't like your site or the goods you have for sale, you are out of business.

These are just some of the reasons why we at Futon Covers USA have gone online. We are one of the largest discounters of US-manufactured futon covers. We are based in Washington D.C., but sell to customers all over the US. Our prices are reasonable, because we only buy futon covers that meet our high standards of workmanship and quality from US-based manufacturers, to give you pricing benefits. We can give you a one-year guarantee on our products against any and all defects, and ship our covers free all over the US. If you buy a futon cover from us, and it turns out to be defective in any way, we will replace it free of charge.

However, if you wish to return a non-defective futon cover, you should do so within 14 days of its receipt to be credited the full purchase price. You should not have used or damaged the futon cover you return, and you will have to pay the shipping charges.
